- Callers to your number pay US\$0.05/minute or nothing

WHAT IS ROAMING ?

When you are at home, you are using the cellular stations of your wireless operator to make and receive calls.

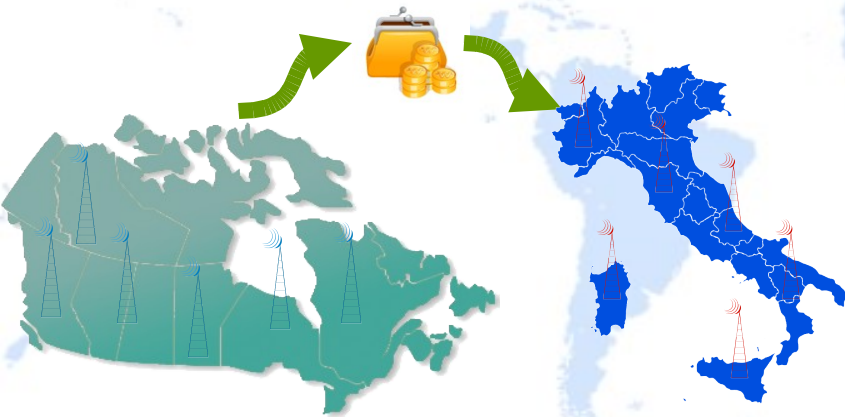

In a foreign country your wireless operator doesn't own Cellular stations to provide you with a coverage, therefore your operator has to "Lease" stations that belong to a foreign wireless operator to provide you with coverage that you will need.

WHAT IS ROAMING ?

Foreign Country operator charges your home country operator a per minute rate for connecting your calls while you are in their country.

This Per minute rate for Leasing the foreign operator's Network is called "**MOBILE TERMINATION CHARGE (MTC)**" and is determined by individual roaming agreements between individual operators. Your per minute rate for incoming/outgoing calls in roaming is:

MTC

+

Your Operator Charges

Important!

Mobile Termination charges occur only when you use your mobile handset! There are no MTC Charges for the landline Usage.

HOW DOES YES1 SIM WORK ?

YES1 SIM works exactly the same way but brings you incredibly low rates by:

1. Utilizing our innovative callback System
2. Using YES1 "Concierge" service
3. Negotiating better MTC rates with wireless operators

YES1 SIM Offers **three ways** of connecting your calls

1. Standard

- Connecting calls to your YES1 SIM Number
- Higher Rates because of MTC but lower than your operator's

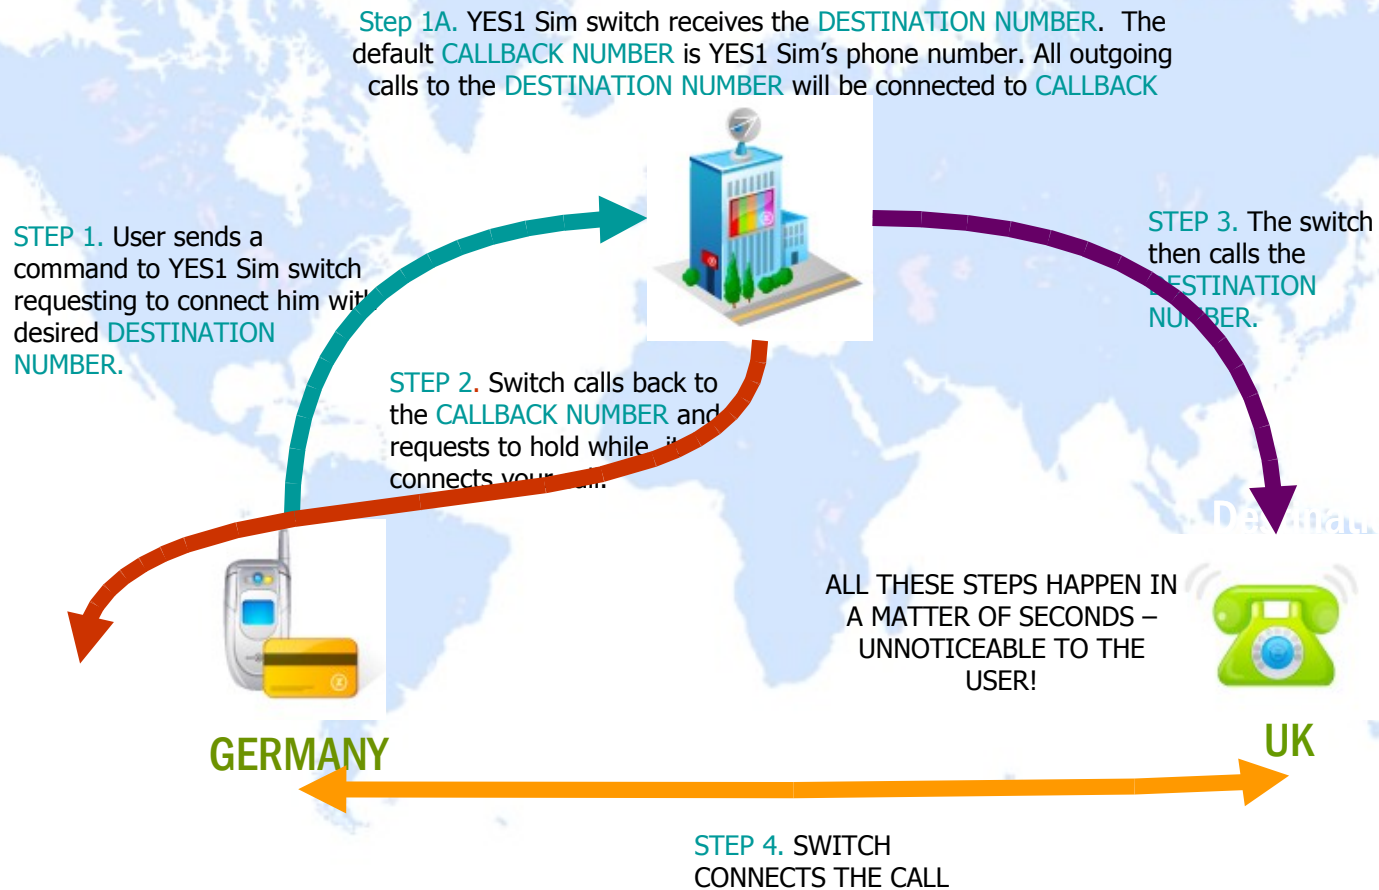

2. Concierge

- Connecting calls to your hotel room or any PBX system
- Cheapest rates due to absence of MTC

3. Trigger

- Connecting calls to any other landline or mobile phone, where MTC is 0
- Cheapest rates due to absence of MTC

HOW DOES YES1 SIM WORK ?

A light blue world map is visible in the background of the slide. The map shows the continents and is centered on the Atlantic Ocean. A solid teal horizontal bar is at the top of the slide.

HOW DOES YES1 SIM CONCIERGE SERVICE WORKS ?

- Calls Received on your YES1 SIM, will cost around **\$0.45/ minute** in most countries because of MTC

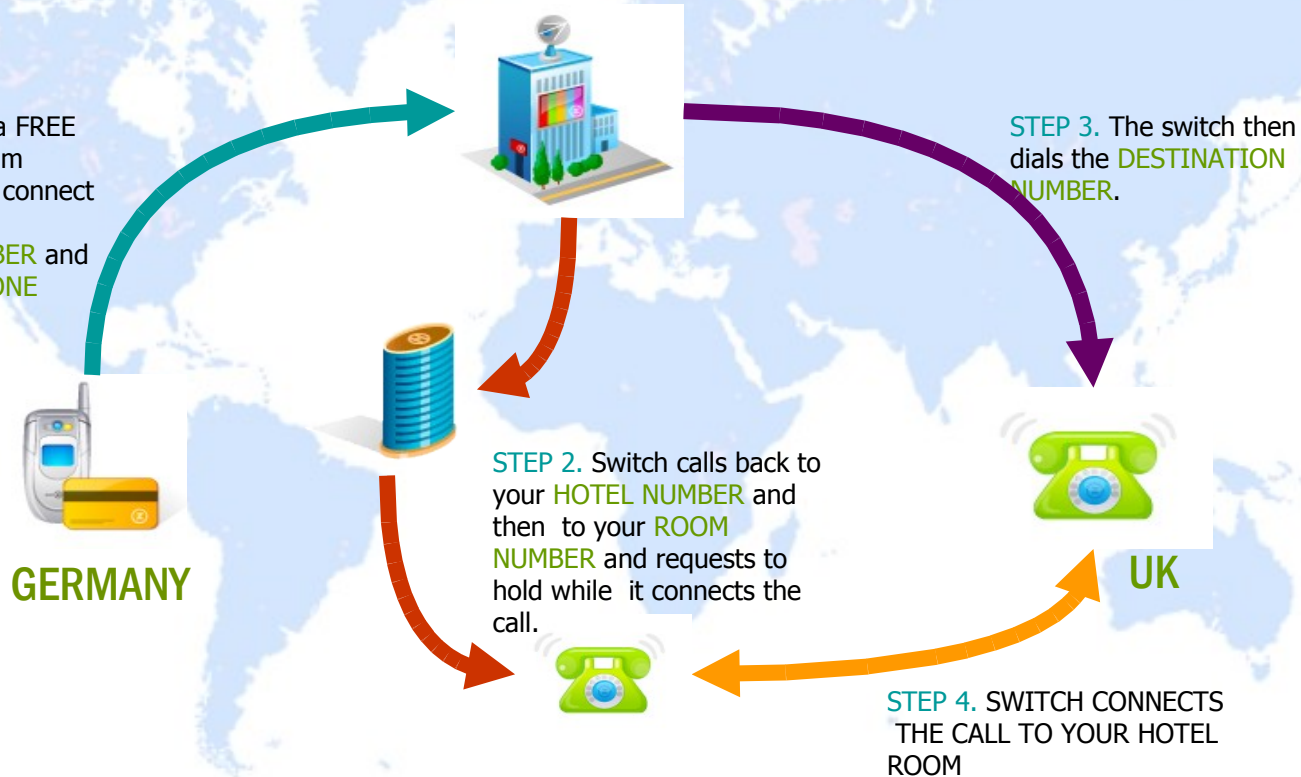

But

- If you are staying in a hotel then use our "**Concierge**" service to connect your calls to your room. You will not need any other service after you try the "**Concierge**" Service.

HOW DOES YES1 SIM CONCIERGE WORKS ?

Step 1A. YES1 Sim switch receives the **DESTINATION NUMBER**, **HOTEL NUMBER** and your **ROOM NUMBER**. Now all outgoing calls to the **DESTINATION NUMBER** will be connected to your hotel room .

STEP 1. User sends a FREE command to YES1 Sim switch requesting to connect him with desired **DESTINATION NUMBER** and specifies **HOTEL PHONE NUMBER** and **ROOM NUMBER***.

* Please note that users do not need to specify the callback numbers every time they dial a destination number. System remembers the last callback number automatically.

HOW DOES YES1 SIM TRIGGER SERVICE WORKS ?

YES1 SIM works with USSD signaling for triggering a “Call Party A and then Call Party B and then Connect the 2 Parties” operation for call making a call. The Connection or bridging of the 2 legs of a Call is made in YES1’s Service Platform to enable a telephone conversation.

In “Call Party A and then Call Party B and then Connect the 2 Parties” mode of operation, the Party A may be the telephone number of a local fixed line telephone (as in the case of a hotel room phone) or a local SIM in a dual-SIM mobile handset and the Party B is the Destination Number (i.e. the telephone number of the party to be called). Note that receiving a call with a local SIM in most countries is **FREE** and receiving calls with a fixed line telephone is FREE in all countries.

HOW DOES YES1 SIM TRIGGER SERVICE WORKS ?

Step 1A. YES1Sim switch receives the **DESTINATION NUMBER** and the new **CALLBACK NUMBER**. Now all outgoing calls to the **DESTINATION NUMBER** will be connected to the new **CALLBACK NUMBER**.

STEP 1. User sends a **FREE** command to YES1 Sim switch requesting to connect him with desired **DESTINATION NUMBER** and specifies a new **CALLBACK NUMBER***.

STEP 2. Switch calls back to the new **CALLBACK NUMBER** and requests to hold on while it connects the call.

STEP 3. The switch then dials the **DESTINATION NUMBER**.

STEP 4. SWITCH CONNECTS THE CALL TO THE NEW **CALLBACK NUMBER**

* Please note that users do not need to specify the callback numbers every time they dial a destination number. System remembers the last callback number automatically.

WHAT ARE THE YES1 SIM PLUS RATES?

Rest assured that YES1 SIM brings you the lowest roaming rates. compared to any other operator in the world. without a need to search for cheap calling cards

Don't overpay to your hotel for international calls

Take a look at these low rates to USA with "**Concierge**" service

When you are roaming in

- Germany - **\$0.10 USD**
- MEXICO - **\$0.10 USD**
- United Kingdom - **\$0.10 USD**
- FRANCE - **\$0.10 USD**

and this is just the beginning ...

YES1 SIM
Rates comparison

YES1 SIM

Rates are far more competitive when placed against rates provided by Vodafone, O2, or Orange.

Your's are the YES1 SIM Advantages and Saving % from various destinations calling back to your favorite destination, like the Americas, Europe, Asia and Africa .

A light blue world map is centered in the background of the slide. The map shows the continents of North America, South America, Europe, Africa, Asia, and Australia. The map is semi-transparent and serves as a background for the text.
